DICKINSON ARMS HUNTER LIGHT OVER & UNDER SHOTGUN

Beauty, Performance and Ease of Handling Combine in a Distinctive O/U
Available in 12 GA., 20 GA. 28 GA. and .410 Bore

The Hunter Light Over & Under shotgun from Dickinson Arms provides hunters and shooting enthusiasts with a unique

combination of aesthetic quality, superior balance and advanced features. Thanks to its lightweight, yet durable aluminum alloy box lock receiver and premium Turkish walnut stock and fore-end, this over & under is easy to handle, a joy to shoot and a pleasure to own.

Available in 12 GA., 20 GA. 28 GA. and .410 bore, this distinctive shotgun weighs between approximately 6.2 and 6.6 pounds — making it an ideal choice for long days in the field. Dickinson's box-lock mechanism, single selective trigger and optional automatic ejector provide sure and reliable shooting performance with 2-3/4" or 3" shells. These premium shotguns are offered to hunters in barrel lengths of 24", 26", 28" and 30" and come standard with a range of mobile choke tubes.

In the Dickinson tradition, the Hunter Light provides a range of features uncommon in reasonably priced over & under guns. The premier grade Turkish walnut stocks feature an oil and satin finish and fine, 24-lines-per-inch hand checkering for distinctive looks and superior feel. The receiver features attractive, hand-engraved English scroll accents. To accommodate the needs and preferences of different shooters, the Hunter Light is offered with a choice of Prince of Wales or Pistol Grip stocks and standard or Beavertail style fore-ends.

In addition to the Hunter and Hunter Light, Dickinson also offers sportsmen a full range of premium quality over & under shotguns across the price spectrum, including the stately Royal Series, elegant Plantation Series, Hunter Deluxe Series, 700 Series, 600/400 Series and 300 Series.
